

Skill: Writing

Write a thank-you email.

Use the model below as example.

Hi Carolina,

I just wanted to write and say thank you for everything.

You and your family were amazing hosts. I had a great time at your house. Thank you for making me feel at home. I'm sure my English improved a lot because of all your help too! Also, thank you for all the wonderful cooking you did. Now I can tell everyone English food is not as bad as they say.

If you ever come to Sri Lanka, I hope you will stay with me and I can show you my city too.

Keep in touch!

Pradeep

Skill: Listening**Questions 1-5**

Complete the information below. Write **NO MORE THAN TWO WORDS OR A NUMBER** for each answer.

Tour information	
Destination	<u>Sydney</u>
Tour type	(1) <input type="text"/>
Tourist attractions	The Harbour Bridge The Opera House The Queen Victoria (2) <input type="text"/>
Timetable	From 7 am to (3) <input type="text"/> pm
Closest stop	(4) <input type="text"/> metres out from here, at the front of the (5) <input type="text"/>

Questions 6-10

Complete the booklet of ticket types below. Write **ONE WORD OR A NUMBER** for each answer.

Ticket types		
minimal	(6) <input type="text"/> \$	Valid during (7) <input type="text"/> hours
(8) <input type="text"/>	30\$	Lasts all day
premium	(9) <input type="text"/> \$	Lasts all day free drinks and snacks (10) <input type="text"/>

READING PASSAGE 1

You should spend about 20 minutes on **Questions 1–13**, which are based on Reading Passage 1 below.

The Earth

(A) The Earth is the third planet from the Sun and it is the only planet known to have life on it. The Earth formed around 4.5 billion years ago. It is one of four rocky planets on the inside of the Solar System. The other three are Mercury, Venus, and Mars.

(B) The large mass of the Sun makes the Earth move around it, just as the mass of the Earth makes the Moon move around it. The Earth also turns round in space, so different parts face the Sun at different times. The Earth goes around the Sun once (one "year") for every $365\frac{1}{4}$ times it turns all the way around (one "day").

(C) The Moon goes around the Earth about every $27\frac{1}{3}$ days, and reflects light from the Sun. As the Earth goes round the Sun at the same time, the changing light of the Moon takes about $29\frac{1}{2}$ days to go from dark to bright to dark again. That is where the idea of "month" came from. However, now most months have 30 or 31 days so they fit into one year.

(D) The Earth is the only planet in our Solar System that has a large amount of liquid water. About 71% of the surface of the Earth is covered by oceans. Because of this, it is sometimes called the "Blue Planet".

(E) Because of its water, the Earth is home to millions of species of plants and animals. The things that live on Earth have changed its surface greatly. For example, early cyanobacteria changed the air and gave it oxygen. The living part of the Earth's surface is called the "biosphere".

(F) The Earth is part of the eight planets and many thousands of small bodies that move around the Sun as its Solar System. The Solar System is moving through the Orion Arm of the Milky Way Galaxy now, and will be for about the next 10,000 years.

(G) The Earth is generally 150,000,000 kilometers or 93,000,000 miles away from the Sun (this distance is named an "Astronomical Unit"). The Earth moves along its way at an average speed of about 30 km or 19 mi a second. The Earth turns all the way around about $365\frac{1}{4}$ times in the time it takes for the Earth to go all the way around the Sun. To make up this extra bit of a day every year, an additional day is used every four years. This is named a "leap year".

(H) The Moon goes around the Earth at an average distance of 400,000 kilometers (250,000 mi). It is locked to Earth, so that it always has the same half facing the Earth; the other half is called the "dark side of the Moon". It takes about $27\frac{1}{3}$ days for the Moon to go all the way around the Earth but, because the Earth is moving around the Sun at the same time, it takes about $29\frac{1}{2}$ days for the Moon to go from dark to bright to dark again. This is where the word "month" came from, even though most months now have 30 or 31 days.

Questions 1–8

Reading Passage 1 has eight paragraphs **A–H**. Which paragraph contains the following information? Write the correct letter, **A–H**, in boxes **1–8** on your answer sheet.

1. Earth's natural satellite

2. Distance between Earth and Sun

3. General information about Earth

4. The Solar System

5. Length of most moths

6. Another name for Earth

7. The living part of the Earth's surface

8. The movements of Earth around the Sun

Questions 9-13

Complete the sentences below.

Choose **NO MORE THAN THREE WORDS** from the text for each answer.
Write your answers in boxes **9-13** on your answer sheet.

9. Apart from Earth, other rocky planets in our Solar Systems are Venus, Mars and .

10. Moon from the Sun on Earth.

11. There are millions of of plants and animals that inhabit Earth.

12. Now the Solar System is travelling through .

13. The dark side of the Moon is the side, which faces Earth.
